

3% and 7% discount on 2017 premiums

We are giving everyone insured with ONVZ a 3% discount on premium of our Basic Health Care Plan and 7% on premiums of supplementary Health care plans*. We have already incorporated these discounts into this table of premiums. How about another discount on your premium on top of that? Pay your annual premium in one go and you will get a 2% discount on your monthly premium as listed in the table. Prefer to pay for six months? Then your additional discount will be 1% on your monthly premium. And for quarterly payments you will receive a 0.5% discount.

ONVZ Basic Health Care Plan

Insured parties aged 18 years and above have a compulsory excess of € 385. A voluntary excess is also possible. Together, the compulsory and voluntary excesses make up the total excess per year. Insured parties under 18 do not pay a premium for the Vrije Keuze Basisverzekering and have no compulsory excess. It is also not possible for them to opt for a voluntary excess.

Simply calculate your premium online at www.onvz.nl
